

# ADDRESSING EVERYONE EVERYWHERE

Edenmap helps you to strengthen the social and economic inclusion of your region.

Thanks to a software suite that integrates all  
from creation to management

# A BUSINESS SOFTWARE SUITE BACKED BY PERSONALISED SUPPORT

## The software suite 'The Address Factory'

### PRODUCTION SOFTWARE

*Generate, collect and update your route and address data*

- Extraction of data from **bâtiments**
- Track **entry** on the tracks
- Improving the reliability of **addresses**
- Mobile application for **field survey**

### MANAGEMENT SOFTWARE

*Analyse, certify and exploit your address databases*

- **Cartography** address data
- Track and road **place names**
- **Certification** document management
- Scripting the **signage**
- Modules **land** and taxation

### BROADCAST SOFTWARE

*Share and promote your addressing information*

- Application '**Phaar**' (physical addressing in augmented reality)
- Application '**Balliz**' (Augmented Reality signage & itineraries)
- Application 'Citizen' for the issue of **certificate of residence**

Giving meaning to territories so that each one can officially exist

Compliance with standards (UPU, addressing standards)

Protection and Data Sovereignty

Adaptability: adapts to all urban forms

Implementation support

Economical: cost indexed to the number of inhabitants

Scalability: maintenance (software updates)

«Deploy a turnkey tool that creates new opportunities for your region».

- Improving emergency services
- Territorial knowledge and security
- Making civil registration more reliable
- Local economic development
- Developing local employment
- Securing taxes and duties
